It is easy to store, carry and convenient for traveler. With the rubber paint handle it gives a comfortable grip when using the scale to weigh your luggage or package anytime and anywhere during travelling or when required. This luggage scale is also a good choice as gifts for your family and friends. Avoid hassles at the checkin counter, save your hardearned money, and travel with peace of mind and confidence. Unravel the black strap seen in the picture; Remove the plastic battery stop; Slip through a handle or strap the scale strap and clip back over the scale; Power on
about 2 second hold,
Wait for Zero read; Lift and hold till the display flashes 3 times,
that is the weight.
Chances are, if you love to travel, you have run into this issue before. The only ture way,
and convenient way, to ensure that this is avoided is to invest in a Camry Luggage Scale.
Lift up on the scale and hold until the display flashed 3 times. The value displayed is the weight. To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. Please try again later. Rich N. 5.0 out of 5 stars I needed a scale that was affordable, reliable, accurate, and easy to use. With the Camry model, I got just that. The scale itself is comfortable in the hand. I guess most importantly, the data it provided was exact to the tenth of a pound with what carrier scales have registered. I knew nothing about Camry before buying this scale, but as it currently stands, Im a fan worked beautifully. If youre tired of comparing options and reading reviews, add the Camry scale to your cart and consider your weighing needs covered.

I can say with extreme confidence that this scale works for me.
I found out that it doesnt weigh accurately a few months later when I used it for the first time. It weighted my bag at 46 pounds, but

at the airport it was 52 pounds. I had the same issues coming home with the airport weighting my bag at 49.5 and the scale reading 44. I purchased a Camry and a Dr. Meter at Amazon. They look identical, but the Dr. Meter was a dollar cheaper. It also has a blue back light, this one does not. Also, the latch to wrap around the suitcase is not as nice as some other products. If you are bent on this product, buy the Dr. meter as it looks identical, has a back light and is a dollar cheaper. I am a chronic over packer and this device is critical for avoiding overweight charges. Airlines are so strict now. I bought this to replace my other one that uses up all the battery power when not in use. If I forgot to remove the battery after using it, it was dead the next time I took it out. This one does the same thing. So now I have two that annoy me and those little 2032 batteries are not cheap. This little scale saved us lots of money at the airport. My husband and I recently took a cruise. We were fine going, but on the way back I was over the weight limit on luggage. I put some of my things in my carryon and a few things in my husbands suitcase. It worked. It is very accurate as well. My luggage weighed exactly what the scale said when we got to the airport. I had never thought of purchasing a hand held weight scale before, but Southwest airlines only allows 40lbs, which is really tight. I highly recommend this product and would purchase again in a heartbeat. I have had several scales like this over the years, some of which were left on holiday by mistake, some were bulky or uncomfortable to hold and some fell apart after much use. This Camry was accurate. It was easy to use, comfortable in 2 hands and registered the weight very fast.

I wish the strap were 2 inches shorter as I am not tall and that would help me hold the weight but as this sets so fast it really is not an issue. The other 2 I tried were not as fast or as accurate and one felt as if it might break with just 39 pound bag on it. Unfortunately I was not able to use it. It did not have a hook on it where I could hang it from an iron gate to weight my luggage. I am a female and do not have the strength lift the luggage. My previous luggage scale allowed me to hang it from my iron gate to hold the scale and luggage as I read the weight. Also the function buttons had a cheap plastic covering that kept coming loose when you turned off and on. When I received, I tested it on 2 of my sandbags that I use for my photography. The 15lb back weighed in at 15.4 and the 20lb bag weighed in at about 20.4. So, its almost pretty accurate. My only problem is that I received a faulty battery with it. It comes with a battery. I used it maybe 3 or 4 times on the first day I received it. To be safe, I even took the battery out so it wouldnt burn out. When I went to weigh my luggage again a few days later, the battery had stopped working. It hasnt even been ONE week and the battery it came with died. I replaced the battery with a new one and its good again. Other than that, its pretty accurate. Thought Id go digital my advice dont. I weighed my case 3 separate times and it gave 3 different readings 1.5 KGs apart which is of no use when youre trying to make sure you dont exceed your weight allowance. This gave me one reading of 19.1 KGs yet at the airport my case actually weighed in at 21.5 KGs thankfully the checkin staff were very understanding. Be warned. Ill be buying another manual scale. Sorry, we failed to record your vote. Please try again It came with a little bag for the scale, so makes it easy to carry with you anywhere. Definitely going on holidays and trips with me.

It is self explanatory to use but the manual that came with it is easy to understand. The last test to see how accurate it is and I can only verify that at the airport. Sorry, we failed to record your vote. Please try again This is great. The weight on check in is consistent with the scale bought, so I trust it. Plus its small so easy to pack and easy to use. I would really recommend this product. Sorry, we failed to record your vote. Please try again Sorry, we failed to record your vote. Please try again A very good accessory to have when you are limited by luggage restrictions. Sorry, we failed to record your vote. Please try again Sorry, we failed to record your vote. Please try again Sorry, we failed to record your vote. Please try again It has worked very well throughout the time I have owned it. Sturdy build and feels very robust.
