Until the Rebel came out, I was still using my 35mm, 1978 enthusiasts SLR, which fell short of the top professional models but is now recognised as one of the industrys classic cameras. If you must know, its a Pentax ME Super. I have a 70s wideangle zoom and a telephoto zoom from the same era, as well as the standard prime. Overall, that set me back. I wanted a travel camera, so I looked at the 300D. It is lighter and in most cases performs as well as the 10D. There are exceptions but I have an Elan 7E film camera that will fill the void flash compensation and the like. I am very happy with the ease of use and the picture quality is great. It isnt as full featured as the 7E but then I seldom use. I was hesitating to buy 300D or 10D before. But, now, I found that 300D is exactly an excellent camera for amateur photographer. 300D is light enough to take to anywhere friends gathering, dating, family picture.. Its COOL!!! If you want a more professional look, buying Battery Grip BGE1 for this camera will give you a huge size. You will like it more. I like this camera. <http://www.lichtengeluid.eu/images/uploaded/bridge-administration-manual.xml>

I think you will have this. Problems None yet La lente que trae es de poco zoom. Cuerpo aparentemente demasiado delicado. Great picture quality. I like EFS lens. A very little noise, good WB. Problems USB 1.1 in camera with RAW format. Life is so short. I initially bought this for small jobs but now its my first choice out of my camera bag. I have taken over 1000 pictures now and find all the settings easy to use.. The autofocus works well and instantly poor in the coolpix the metering sistem works well but not so well like Nikon! The image quality is excellent, a little soft to me but in Photoshop is easy to correct, white balance works very well in auto mode to flash pictures in studio and the battery life is super. Excellent value for money. Problems The monitor shows a soft image than is not the reality soft focus in monitor an excelente. Shedding some light on the sources of noise.
