Your first point of warranty service is your dealer. Verify that the speakers are correctly placed inside your helmet by following the next steps. This is where the speakers should be positioned. Check to make sure the speakers are in this position. If necessary, use the included Velcro booster pads behind the speakers to get them closer to your ear. If this is the case consider placing the speakers outside your helmet ear cavities right opposite your ears. Turn it back on again and you're set. Be sure to plug your unit at least once every 3 months for full 4 hours to ensure maximum battery life. You still can pair to your iPhone, and enjoy full phone functionality including listening to music, but without the Smartset app. What can I do Search for the small yellow triangle near the boom and make sure it faces your mouth. If the issue is noise from wind turbulence, put a larger mic sponge on the mic to help reduce it. The larger sponge is included in your package accessories.

If you cannot find it you can purchase it as part of a replacement microphone. If this does not work, try using a different wall charger and USB cable. If the unit still doesn't charge, please contact support. DO NOT attempt to disassemble or replace the battery on your own. DO NOT open the unit. It will no longer be waterproof! If your unit is out of warranty, you can find replacement batteries on

3rd party's websites and in specialty electronics retailers. That said, we DO NOT recommend replacing parts on your own, for risk of water, dirt and general electronics damage. In case you do hear a loud beep make sure that you say the correct phrase exactly as described in the user manual in quick succession of the beep. LED should light in red. Should that happen, proceed with the following. At this point, if you still can't upgrade the FW, please try using a different USB cable or a different Computer. What next Using a Smartwatch Try turning it off before starting the app, and only then turn the smartwatch back on. If all above does not solve the issue, proceed with the following. If it still doesn't connect, turn off your unit with the app running and switch it back on. Connect your smartphone to both the bike system and the Cardo unit directly. If the above does not solve the issue, proceed with the following. If it still doesn't connect, turn off your unit with the app running and switch it back on. Replacing the battery by yourself could damage the system's waterproof ability. However, you can try the following. Plug in your unit to the charger and leave it charging for at least 4 hours straight. If this does not work, try using a different wall charger and USB cable. If the unit still doesn't hold a charge, please contact support. Post your question here in this forum. We're committed to dealing with such abuse according to the laws in your country of residence. When you submit a report, we'll investigate it and take the appropriate action.

We'll get back to you only if we require additional details or have more information to share. Note that email addresses and full names are not considered private information. Please mention this; therefore, avoid filling in personal details. Please enter your email address. It has a built-in FM radio with RDS and a jack/plug socket for non-A2DP MP3 players. Bahraini Dinar .. Boliviano Bs Hryvnia. Serbian Dinar Din. Forint Ft Lebanese Pound . Moroccan Dirham Dh Won. Qatari Rial .. Rand R Rial Omani .. Baht Croatian Kuna kn Dong.It offers many new and innovative functions, and is a stereo Bluetooth headset for a riderpillion intercom and an RDS FM radio receiver in one. With this new device, voice instructions from your GPS sat nav e.g. TomTom RIDER or Garmin zumo and phone calls from up to 2 Bluetooth mobile phones are forwarded to you directly, with top audio quality. An integrated RDS FM radio receiver with 6 programmable station presets rounds off the ample features offered by this communication device. The wireless installation kit for motorcycle helmets can be fitted to almost any helmet ready for operation within a few minutes. Radio reception via integrated RDS FM module 6 programmable station presets Presentacion buena, espero que vayan como dicen. 24.02.2017 Si bien es cierto que los enlaces entre Cardos no vinculados por CLICKTOLINK se me antoja complej y todavia no he conseguido enlazar. El sonido es bueno y la instalacion para alguien manazas como yo ha sido muy sencilla.Calidad muy buena. Sonido en llamada un poco bajo. Muy buena calidad cuando reproduce musica del movil. Recomendado.The sounds is clear, it is easy to install and the battery time is enough. When constantly speaking, we have managed to have this on for about 45 hours. I connect it very easily to my phone and keep spotify on. It is easy to handle, and you can accept calls handsfree so you never have to let go of the handle bar.Gut sind die NaviAnzeigen, die kommen klar durch. Nicht besonders gut funktioniert die Kommunikation mit der Sozia. Das Cardo blockiert während den Anzeigen die restliche Kommunikation, die Sozia kriegt davon aber nichts mit nur 1 Gerät mit Navi koppelbar und redet munter weiter.

Auch wird der Bluetooth durch die Navi viel zu lange blockiert, das heisst, auch wenn die Anzeige vorbei ist wird der BluetoothKanal lange nicht wieder freigegeben. Ist aber eventuell von der Navi abhängig, und nicht vom Scala Rider. Auch benötigt der Standby viel zu lange um aufzustarten. Will man die Sozia auf etwas am Wegesrand aufmerksam machen oder umgekehrt, ist das langst vorbei, bis der Scala Rider endlich das Bluetooth aufgebaut hat. Es lässt sich nur noch sagen, was verpasst wurde. Nicht sehr toll. Geplante Kommunikation während NaviPausen funktioniert aber ganz gut. Während einer langen Regenfahrt ist Wasser in den Zwischenraum zwischen Gerät und Helm eingedrungen und hat ein sehr lautes statisches rauschen verursacht, ich musste den Scala Rider ausschalten und mit Sicht auf das Navi ohne Anzeige weiterfahren, bis ich gelegenheit hatte, die Kontakte zu reinigen und zu trocknen. Hatte vorher ein kabelgebundenes System, ist zwar umständlicher um sich anzustecken, wurde aber sofort, wenn es noch möglich wäre, zurückwechseln, es war soviel besser.L'utilisation est simple et le site internet permet de faire les réglages sans se prendre la tête avec les touches du module. Les HP donnent un son très correct. Plus de plaisirs à partager la balade à moto. Choose one of the products to easily find your manual. Cant find the product you are looking for. com If you continue to use this site we will assume that you are happy with it. Read more Ok. The Scala Rider TeamSet PRO automatically adjusts its sound level as your riding conditions change. We despatch orders at 5.30pm on Monday, Tuesday, Wednesday, Thursday and Friday. We need to receive your order on those days by 4.30pm. When possible we may despatch orders received after that time. No orders are despatched after 5.30pm and no orders are despatched on Saturday or Sunday. Click here for further info. All options also appear at the basket pages. The Scala Rider TeamSet PRO automatically adjusts its sound level as your riding conditions change. Each headset has the ability to independently initiate, accept or reject incoming calls by voice control. Plagiarism software in use do not copy any of our website text, images or videos. It offers wireless handsfree communication without compromising comfort or safety. It is totally easy to use and truly opens up a whole new realm where functionality and entertainment perfectly meets. One can take, make, and even reject calls without lifting a single finger through the voice control. In addition, this headset has the capability to automatically adjust the sound level depending on the user's riding condition. Cardo Scala has always been a brand that is geared towards providing an efficient rider to passenger communication. Despite being extremely easy to install and use, the motorcycle intercom Cardo Scala Rider SRTS0102 has quite a number of great features which surprises critics and delights the users. Most motorcycle riders today ignore the manual and entirely rely on intuition alone. This also ensures that the user will get maximum benefits by knowing each feature of this intercom. Clarity of audio is surprisingly great up to a workable 150 meters. Let us get to know more of these amazing features. Typically, this technology is the better alternative for pushtotalk button which most experts think is safer as well.

This is actually just an option. Riders can still control the volume manually though especially for those extra short rides. Just like the VOX technology, this AGC technology can also be customized to suit every motorcycle rider's preferences. These features should put every motorcycle rider's mind at ease. Because of the multiple device connectivity, one can easily connect up to two Bluetooth connections and to other Scala riders via the motorcycle intercom. This is made possible by the more advanced circuit that VOX technology has. Such technology by Cardo Scala is more sensitive and is designed to work even in noisy environments as could be expected. It is such an efficient communication method that comes at a very low price especially if you are to compare it to other brands and models. However, there are a few ones who say that the volume was so low. Remember that the volume automatically adjusts but you can always adjust it manually. It paves way for easy and clear communication. It even offers more than just plain communication with entertainment and navigation features.
