We are a trusted supplier to 1000s of schools, government agencies, military and repair shops worldwide. Send your laptop to the Dell Experts! PartsPeople began as a small company 17 years ago in an extra bedroom of my house. I had saved a small sum of money to purchase some computer parts and began selling them on eBay. After a few months I realized that people needed a place to go for Dell parts so I began building our website. Since we are located in Austin, Texas, where Dell.com was founded, I was able to set up a solid supply line with Dell. From the start, we focused on customer satisfaction and selling quality parts. We have grown a lot since 2002 but still and always the customer will come first. You will find that we go above and beyond with every order and offer free resources and support before and after the sale. These Dell repair manuals for the Dell Latitude D630 notebooks are designed to teach you how to install and replace Dell parts that you have purchased from PartsPeople.com. Feel free to ask questions or request new tutorials. This will take you set by set through the complete installation and replacement process. The only tools needed is a small phillips head screw driver and a small flat head screw driver. This will take you set by set through the complete installation and replacement process.
