Champion recommends that regular service be completed on its pumps for maximum operating efficiency. They are compressors produced for the most varied purposes. One of them will surely meet your requirement. It is a genuine Brazilian company in Santa Catarina, with head quarter in Joinville SC and acknowledged as being one of the most complete air compressor factories in the world. The company offers the residential, professional and industrial market a complete line in the generation, treatment and storage of compressed air. From the beginning of the production of its first products in 1963, to the start of the air compressor models, in 1972, Schulz soon became the most complete Brazilian manufacturer of air compressors. In 1984, the Schulz products were already present throughout Latin America, in Central America and the USA. Today, the products of Schulz are present in more than 70 countries, being a global supplier of solutions for compressed air and equipment for household, professional and industrial use, which reinforces the tradition and high technological standard of the equipment. Schulz Compressores invests in innovation and quality to handle from the demand of users who work at home to the professionals in workshops, tire repair, body shop, service stations, joineries, metalwork, toolrooms, building, rural and industrial properties, or various engineering works, among other applications.

Schulz, guarantee of quality, safety and performance with tradition and durability. Click on the accept button to agree with our. Industry Leading Performance Program Industry Leading Performance Program Evaluate the capabilities of your existing equipment and optimize equipment performance for your application and operating conditions Industry Leading Performance Program Industry Leading Performance Program Includes full access to Ariels Application Manual and Packager Standards Industry Leading Performance Program Click on a button below to login or to request an account. Signing up for an account allows you access to valuable information and software available only to Ariel members. The License includes the right for any of your contractors to download, install and use the Program solely for the purpose of providing services to you relating to Ariel's products. You may not export any of the Program except in compliance with applicable export laws of the United States, and the ECCN number for the software portion of the Program is EAR99. Upon termination of the License, you shall immediately cease using the Program and shall delete all copies of the Program. You may not remove and proprietary rights notices in the Program. The install will update all necessary files to upgrade to the latest release. The install uses an InstallShield Install script. C:\Program Files\Ariel is the default location for the application. You may choose another path or folder. A shortcut for Ariel Performance will also be put on your desktop. You may need to restart your PC for the shortcuts to appear. Therefore, we have to create this file first and then use it while running the install on the Client PC.

When changes are made through that interface, the locations are stored in the Registry of that PC. Then whenever the program is started, either from a local install or network install, it will read the registry and use the file locations stored there. That is where the INI files come into use. The program will read the INI file first and use whatever locations that are set first, then it will go to the Registry for locations. The install creates an initial INI file, but every line is commented. If you need to set one or more locations, just remove the semicolon from that line and edit the path. The following is a list of the folders that are created and what rights they require. The folder locations are listed base on a standard installation. Access creates an ldb lock file whenever anyone runs the program. Because of that, you cannot secure this folder. It is data that can be user specific or All users, i.e. Drivers DB, Shipping Address, option groups, etc. This is the default location. The Key is then Saved in the Ariel.pwd file in the Program Files\Ariel\Performance folder, so make sure you have write rights when entering the Key. The Performance program uses this database and needs to know where it is located. Enter the location of the Ariel Databook or use the Browse button to find its location. The Ariel Database is Arldata.mdb. The Database and program are a matched set. If they become out of sync, then this kind of error is possible. The reason usually is because the required Microsoft DAO 3.6 feature is not installed or is corrupted. Refer to FAQ on Installing DAO 3.6. b. If that does not fix the crash, then email Ariel with your contact information and a screen shot of the

splash screen with the error. Take a look around! Cordless freedom included! You will find instruction manuals for all our tools on the Einhell Service online portal.

Our comprehensive search feature lets you search for instruction manuals of the older models which are no longer listed in the current product assortment.
